

## COMPANY PHILOSOPHY

1. Emerging customer needs are the drivers behind every innovation that we do.
2. We commit to continually understand market needs and address them with innovative solutions
3. Every one for us is a "client" and not a customer
4. As a team we are committed to quality at work and gratification to client.
5. We are not in this business to help you buy, but to help you earn with us.
6. We believe in gauging our assets with our client's satisfaction rather than the accumulated profits.
7. Our true measure of success is client profitability.
8. We hire people who are passionate to do what they love to. We hire talents and not profiles.
9. People, Processes and Systems are our three pillars of Business.
10. We have our strategic objective well defined and is imbibed into every share holder at SocialCreeper.
11. We respond to our communities around and have the sense of social responsibility. We share our profits with clients – in the form of new product innovation, with employees – in the form of shares/ dividends and with community – in the form of funding.
12. Though we are a web based company, we are built with brick and mortar of trust and success stories.
